**Trophies : For all the drivers a memory.**  
There will be an Eus-memorial exchange trophy.  
The name of the winner will be engraved in this trophy.  
The trophy will stay at the MRTU for the races in the future.

## THE DUTCH RACE SYSTEM

The Group 12, Wing-car race will be according the Dutch System, this means:

- 1: No qualification.
- 2: The name of every driver, participating in the race, will be entered in the computer system.
- 3: The computer system will make the run and starting lane classification by random selection. The number of runs depends upon the number of drivers.
- 4: Each driver will drive a run (6 times 2 minutes, lane-change 2 minutes).  
This is called the First Run.  
The 2 fastest drivers from the First Run (all drivers) will enter directly into the Final.
- 5: The other drivers will be classified (see point 3) for a new run.  
This is called the Second Run.  
The 2 fastest drivers from the Second Run will also enter directly into the Final.
- 6: The last 2 Final places will be granted to the 2 drivers left, with the best total results (individual results First and Second Run counted together).

So the 6 drivers for the Final (6 times 5 minutes, lane-change 3 minutes) will be selected as follows:

1. 2 fastest drivers from the First Run.
2. 2 fastest drivers from the Second Run.
3. 2 drivers out of all left, with the best Total result (1<sup>st</sup> and 2<sup>nd</sup> Run).
